Northern California White House Conference to Meet in Sacramento

The Northern California White House Conference, called by the Honorable James Rolph, Jr., Governor of California, will be held in the auditorium of the Sutter Junior High School, 19th and K streets, Saturday, January 21, 1933. This conference will cover subjects related to child health and protection, and representatives of all counties of Northern California will be present. Governor Rolph's representatives in the organization of the conference are Doctor Giles S. Porter, Director of Public Health, Mrs. Rheba Crawford Splivalo, Director of Social Welfare, and Vierling Kersey, Director of Education for the State of California.

The conference is in the nature of a follow-up for President Hoover's White House Conference on Child Health and Protection, which was held in Washington last year. Its main objective is to determine the available machinery in the promotion of child health and child welfare. Its work embodies medical service, public health and administration, education and training, and social welfare.

President Robert Gordon Sproul, of the University of California, will preside. The sessions will open at nine thirty, and Mr. N. P. Neilson, Supervisor of Physical Education in the State Department of Education, will outline the plan of organization. Doctor W. P. Sheppard of San Francisco, Secreatry of the Western Branch of the American Public Health Asso-

ciation, will summarize the discussion. The conference will assemble in groups during the luncheon hour, at which time special subjects will be discussed by each individual group. In the afternoon, Doctor Ellen S. Stadtmuller, Chief of the Bureau of Child Hygiene of the State Department of Public Health, and Chairman of the Executive Committee of the Conference, will discuss the program work. Following Doctor Stadtmuller's address, reports of section chairmen will be received and discussions will follow.

Following the Northern California Conference, similar conferences will be held in each of the counties in the northern part of the State.

Following are the names of the chairmen of committees in each of the counties which will be represented in the conference:

SACRAMENTO DISTRICT CONFERENCE CALIFORNIA WHITE HOUSE CONFERENCE

January 21, 1933

Sutter High School Auditorium, Nineteenth and K streets
County General Chairmen and Chairmen of County Sections

Alpine County

General Chairman, ---

Education and Training, Mrs. E. M. Bruns, Gardnerville, Nevada

Social Welfare, Mrs. Inez Kanig, Markleeville

Amador County

General Chairman, -

Medical Service, Dr. W. F. Lowe, Jackson
Public Health and Administration, Dr. G. L. Lynch, Amador
City
Education and Training, Mr. Wallace A. Wilson, Jackson

Social Welfare,

Butte County

General Chairman, Mrs. W. E. Duncan, Oroville

Medical Service, Dr. J. G. Hepplewhite, Chico Public Health and Administration, Dr. B. Caldwell, Biggs Education and Training, Mr. Jay E. Partridge, Oroville Social Welfare, Mrs. Thomas J. Richard, Chico

Calaveras County

General Chairman, Mrs. Ethel G. Robertson, Murphys

Colusa County

General Chairman, Mrs. Helen K. Davison, Colusa

Medical Service, Dr. C. A. Poage, Colusa Public Health and Administration, Dr. G. W. Desrosier, Colusa Education and Training, Miss Perle Sanderson, Colusa Social Welfare, Mrs. W. H. Ash, Colusa

El Dorado County

General Chairman.

Medical Service, Dr. A. A. McKinnon, Placerville
Public Health and Administration, Dr. A. A. McKinnon, Placerville
Education and Training, Mr. E. J. Fitzgerald, Placerville

Social Welfare, Mrs. L. Sumner, Placerville

Glenn County

General Chairman, — - -

Medical Service, Dr. W. H. Walker, Willows Public Health and Administration, Dr. F. M. Lawson, Willows Education and Training, Edgar P. Mapes, Willows Social Welfare, Mrs. Harry Clark, Hamilton City

Lake County

General Chairman-Mrs. Sylva R. Mosher, Kelseyville

Medical Service, Dr. Chas. A. Craig, Lakeport Public Health and Administration, Dr. D. C. Strong, Upper Lake

Education and Training, Minerva Ferguson, Lakeport Social Welfare, Mrs. Taylor Day, Lakeport

Lassen County

General Chairman, ----

Modoc County

Napa County

General Chairman, -

Medical Service, Dr. D. H. Murray, Napa
Public Health and Administration, Dr. Robert S. Northrop,
Napa
Education and Training, Miss Eva Holmes, Napa
Social Welfare, Mrs. H. H. Sawyer, Napa

Medical Service, Dr. F. L. Sloane, Red Bluff
Public Health and Administration, Dr. F. J. Bailey, Red Bluff
Education and Training, Mrs. Alta S. Ohrt, Red Bluff
Social Service

Trinity County

General Chairman, Mrs. Blanche Spratt, Weaverville

Medical Service, Dr. Chas. H. Law, Weaverville Public Health and Administration, Dr. Chas. H. Law, Weaverville

Education and Training, Mrs. Clara E. Kreiss, Weaverville Social Welfare, Mrs. Ethel Hailstone, Del Loma

Yolo County

General Chairman, Mrs. Fred Meier, Woodland

Medical Service, Dr. Ruth Risdon Storer, Davis
Public Health and Administration, Dr. Fred R. Fairchild,
Woodland

Education and Training, Mrs. Rowena M. Norton, Woodland Social Welfare, Mrs. Everett Griffith, Woodland

Yuba County

General Chairman, -

Medical Service, Dr. Wm. L. Crutchett, Marysville Public Health and Administration, Dr. J. H. Barr, Marysville Education and Training, Mrs. Agnes Weber Meade, Marysville Social Welfare, Mrs. P. T. Smith, Marysville

THE TEST OF CIVILIZATION

Every man has to discover his own place in the world so that his energy may be employed. How to do that is the great lesson of life. It is learned gradually as we absorb the meaning of man's greatest achievements. It is the result of familiarity with what man has done in the past. That is what is meant by acquiring a sense of values; to know what are the most important things in life, and to make them one's own; to know what to imitate, what to measure oneself by, and how one's life may be formed. These are the gifts of civilization. They are not secrets; they are open to everyone.

In these days what is primitive and natural to man is admired because of its contrast to the sordid and soul-destroying conditions of city life. But neither nature nor savage man can give us the standards of living that raise the quality of life. Those standards can be found only in the spirit that works in man and nowhere else, giving meaning to human effort. It is the restriction that man imposes on himself or that he recognizes as being imposed on him from above, the limitation of his desires and the order to which he subjects himself that enables him to advance. The freedom of the individual is enjoyed only in society, when men share their freedoms with others. It is not enjoyed in solitude or in the midst of wild nature. It is the man who lives by his will, self-governed and directing his life to a chosen end, who is truly civilized. -Everyman, London.

ROCKY MOUNTAIN SPOTTED FEVER VACCINE

The first of the supply of Rocky Mountain spotted fever vaccine for the coming season will be available about February 1, for distribution from the Public Health Service Laboratory at Hamilton, Montana.

Although the amount of vaccine to be prepared will be considerably in excess of the supply of previous years, it is impossible to know what proportion will be usable. However, it is probable that the new supply will be at least as large as last year. The following points concerning the distribution and use of the vaccine are much the same as in previous years.

- 1. Requests for vaccine should be addressed to the Officer in Charge, U. S. Public Health Service, Hamilton, Montana.
- 2. Each request should specify the number of persons to be vaccinated or the number of cubic centimeters needed on the basis of 4 c.c. to each adult.
- 3. The vaccine is expensive to manufacture and amounts requested should be limited to such use as can be positively foreseen.
- 4. The vaccine is furnished to physicians without charge and the fee for administration should be nominal.
- 5. The demonstrated value of this vaccine is prophylactic. However, there is evidence that vaccine administered soon after the bite of an infected tick may result in a considerable amelioration of symptoms and a shortening of the course of infection. This appears quite probable if one is dealing with strains of virus that cause the milder types of infection. If the strain, however, should be of the highly fatal type, the value of the vaccine when thus used is problematical; it is even possible that it may be injurious.
- 6. Attention is again called to the fact that the therapeutic use of the vaccine is not recommended. Of the physicians who have so used it, some feel that it has been advantageous, others that it has been detrimental. If a highly fatal type of infection is concerned, it appears certain that its use in this manner is definitely contra-indicated.
- 7. It is particularly requested that the officer in charge of the Hamilton laboratory be advised immediately of any cases of spotted fever which may occur in vaccinated persons and that as detailed a clinical record as possible be kept of such cases.

"We know ourselves so little that many think they are about to die when they are really in good health, and many think they are well when, in fact, they are on the brink of death."—Blaise Pascal, 1625.
